Welcome to Agus Token (AGUS) Digital Asset Project For Personal, Our Business & All Crypto Lovers

About Agus Token

by: Agus SA

Agus Token (AGUS) is a digital asset (cryptocurrency) project for the development of our small business in the technology sector. For now, we have a business providing website design services, search engine optimization (SEO), crypto token creation services, selling various digital products and many more.

We have quite a number of online customers from outside Indonesia where we are located in Indonesia and customers face payment problems due to high international transaction fees. for that we took the initiative to make crypto as an alternative to conventional currency users, our customers can buy Agus Token (AGUS) on the crypto market using their currency and use \$AGUS to pay for the services we provide to them.

Besides being able to be used for payments in our business ecosystem, \$AGUS can also trading on crypto exchanges so that \$AGUS can be a profitable investment for anyone and we will continue to increase its conversion value or price by aside a portion of the profits our business for buyback \$AGUS from circulation.

The funds we get from selling \$AGUS through ICO 70% will be allocated to increase the liquidity of \$AGUS in crypto exchanges and 30% will be used for project development and increase our business capital.

We will make a gradual sale with details of the allocation of funds which will be presented via our social median channel announcements and we will always consider the stability of the \$AGUS price in the crypto market before making a sale so, our holders and investors are not disadvantaged.

Agus Token Build on Binance Smart Chain (BSC)

Binance Smart Chain (BSC) is a blockchain network built for running smart contract-based applications. The aim of the platform is to enable developers to build decentralized applications (DApps) and help users manage their digital assets cross-chain with low latency and large capacity.

Some of the benefits of Binance Smart Chain include: A rich and growing digital asset ecosystem powered by Binance DEX, the leading decentralized exchange. Cheap transaction fees that reach as low as 1 cent. High performance with a network capable of producing a block every 3 seconds.

Buy, hold and trade \$AGUS to experience transaction speed, security, convenience and low transaction costs on the Binance Smart Chain (BSC)

Token Details

Creation Time: 2021-04-28

Blockchain: Binance Smart Chain (BSC)

Type: BEP20

Token Name: Agus Token

Ticker: AGUS

Decimal: 18

Total Supply: 100,000,000

Mint: No

Burn: Yes

Contract Address: 0x337c7057c5f702099d2df5413ac2d6fc2eb8a9f7

Roadmap

How is our project development plan?

Q2 2021:

- Concept
- Create Token
- Introducing projects to our clients
